The Conservation Pledge

I pledge to protect and preserve the natural resources of the planet Earth, and promise to promote education so we may become caretakers of our air, water, land, forest, and wildlife.

Victory to the Voters

The YES on MEASURE 15-119 passed with flying colors! Jackson County, OREGON, voters rallied for a landslide victory in protecting *Our Family Farms* from patented *Genetically Modified Organism* (GMO) seed crops with their dependency on chemical addiction. That means *Rogue Taste* and the local *Thrive* economy with its lovely agro-tourism prevailed despite all the Big Money that tried to influence voters through emotional appeals, marketing distortion, and fallacious reasoning. But U.S. voters are the actual people of the *United States of America* and corporate personhoods don't get to vote is the bottom line.

Thank goodness for consult of the governed. The voters are unsupportive of the tyranny of governmental bans against banning GMO crops that the consult of the governed feel are undesirable.

This nation's Founding Fathers threw tea overboard, and Jackson County voters threw outside influence overboard. Some people won't be bought. Self-rule is the essence of the *Republic* for which we stand. The voters have a community bond, an interconnection, and a heartfelt love for *Our Family Farmers*. Keeping local control of local resources and local land use was a higher priority than submission to Big Ag's attempted food tyranny.

There is no higher duty as U.S. citizens than to exercise the right to vote, and this historical day we have made our forefathers glad. Representation is why there was the *American Revolution* by the colonists in the first place. The *United States of America* means self-government of the people, by the people, for the people.

Today's ballot outcome would have made *Thomas Jefferson* and the *Founding Fathers* proud. Jackson County has spoken that U.S. citizenry can arise to the resounding anthem of FREEDOM, "*No taxation without representation*".

STOLEN HARVEST by Vandana Shiva

In 2000 **Vandana Shiva** wrote the book ***Stolen Harvest, The Hijacking of the Global Food Supply***. Grandmothers and others, this would be an excellent read for your book discussion group.

Vandana Shiva is a famous enthusiast for the safeguarding of pure genetic seeds and protecting the human rights of small-scale organic Family Farmers. Life on EARTH arises from the expressed intelligence within Mother Nature's sacred seeds. But Man has raped Mother Nature with laboratory spear guns that insert *Genetically Modified Organisms* and breach transgenetic natural boundaries. GMO/GE seed would never have occurred in Nature. It is man-made destruction of natural seed. **Ms. Shiva asserts that every indigenous culture believes that destroying seed is the ultimate sin and every ecological woe sources to the illusion that Man is separate from Nature.**

The solution is to reclaim oneness with Mother Nature's whole interconnected web of life by planting heirloom seed and growing an organic garden. An heirloom seed sown in the soil makes you one with the EARTH and Mother Nature's cycles. The miracle of Life is naturally regenerative when a pure genetic seed is sown in the soil and becomes a plant, with seed that can be saved and planted. That is how Man learns we are Soil. The elements that make the Universe are what Man is comprised of. You remember this Oneness with the creative Universe. The Universe is self-organized and evolved in freedom that expressed pure genetic seed diversity. Native plant diversity is a deep joy to Mother Nature. To align with Life Force, one could join an heirloom seed exchange and get together with others to plant a neighborhood organic garden.

When you spray poisons to kill Mother Nature's insects, then birds starve. When you kill the "weed diversity", then you murder milkweed which Monarch butterflies must have. You also contribute to colony collapse of the bees. Toxic chemicals harm pollinators. And you destroy soil organisms and upset the natural balance of a Living Planet. Agrochemical farming is a battlefield against the Living Intelligence of the Universe.

Big Ag's concentration of Power has grown into dire chemical warfare proportions against the potential of the chlorophyll Kingdom to self-manage. Nevertheless awareness is rising about the illegitimacy of this concentration of Power. Pure genetic seed grows on its own terms. But a farm of only *Round-up Ready* soya or *Hercules Xtra* GMO monoculture crops is an expression of coercion where uniformity is forced upon Nature. It is like a concentration camp for plants. It puts the Creation at great duress because it destroys the EARTH's interconnected web of Life. The conflict is Godzilla-sized. It is monstrous in its eco-consequences. The anecdote is to safeguard the freedom of non-GMO seed supply.

Ms. Shiva points out that Man is waking up and the number of grassroots movements is huge. Even the UNITED NATIONS' *Human Rights Committee* has decreed **2014 The International Year of Family Farming**. No matter where in the world you are, Man is realizing local food is important and food freedom means unpatented natural seed. Organic gardening could rapidly heal violence. Even ex-convicts could plant organic gardens.

LAWS OF FEAR by Cass Sunstein

Cass Sunstein heads President Obama's OFFICE OF INFORMATION AND REGULATORY AFFAIRS. Mr. Sunstein is an activist for Genetically Modified Organisms (GMO) genetic engineering (GE), and Mr. Sunstein is the author of book **LAWS OF FEAR, Beyond the Precautionary Principle.** The new "Anti-Catastrophe Principle" is from his book and **Obama appointed Sunstein to move quickly on the new science called METAGENOMICS.**

METAGENOMICS is SYN BIO synthetic biology playing God. The *United States of America* has gone mad. *Sunstein's* idea of being vigilant is the diametric opposite of precautionary. He believes that since microbes run the world, there is potential opportunity in taking risks. But if GMO biotech seeds with synthetic organisms are "Organically grown" it would be depravity in disguise.

What's even worse is when PEOPLE ARE TREATED AS MERE PROPERTY. Mr. Sunstein plans on confining the elderly to a robotic environment where robots do elder care. Further find out what's truly going on in AMERICA by also reading **THE FORTUNE AT THE BOTTOM OF THE PYRAMID, Eradicating Poverty through Profits, by C.K. Prahalad.** The book shows how a sense of community is destroyed when houses are treated merely as property, instead of as homes and neighborhood.

Be very afraid.

Peace Be With You

Suddenly organic family farming protection has become a wild card election issue. If you haven't already done so, register to vote for the 2014 November elections. The entire HOUSE OF REPRESENTATIVES and 1/3 of the SENATE are up for election with a growing number of legislators who are retiring, while the FDA looms as a highly visible threat to Food Freedom, and the American People are fed up with the FDA kicking God out the window and bowing in idolatry to MONSANTO's desires.

The tipping point for *Jackson County* was to have voters educate and dialogue with candidates and other voters on the inalienable right that U.S. citizens have for banning of GMO crops. The same educational tipping point can be achieved for GMO food labeling. Voters know that it is too slow a process for GMO products on grocery shelves to be voluntarily labeled by the *Grocery Manufacturers Association (GMA)* and that the GMA spends millions in fighting GMO labeling.

What's imminent is a clash of Titans. **Moms all across America** are supporters of food transparency and have made the annual **4th of July Parade** event a visible platform until the GMOs get labeled. Food freedom messages from mothers everywhere will be seen by millions of people on the sidelines. Mothers, Grandmothers, and others can willingly join 4th of July Parades EVERYWHERE to walk for **independence from GMOs.** For more information contact www.momsacrossamerica.com.

Even though *President Obama* appointed *Mr. Taylor*, MONSANTO's former Attorney and former Vice-President, to lead the FOOD AND DRUG ADMINISTRATION (FDA) and created an OFFICE OF INFORMATION AND REGULATORY AFFAIRS headed by *Mr. Sunstein*, Moms all across AMERICA want food that is free from GMOs. Women will end the GMO food violence being done by laboratory spears because women and children comprise the majority of the world's population. We will not go quietly into the night.

Men can be *Champions of the GMO-free World* by joining the ladies this 4th of July in the world's second international *March for Mandatory GMO Labeling*. In fact, one and all can seize the moment before this year's 4th of July Parade passes by.

In fact all humanity can keep your choices and voices alive and organic food standards pure, by joining the Mom and Pop campaigns at www.POPCampaign.org and www.Moms4Pop.org.

CONGRESS could pass a historic *United States of America* required labeling of GMOs to silence the entire issue from the election dialogue.

According to *Dr. and Mrs. Brian Clement* Genetically Engineered SYN BIO synthetic biology foods are impostors in the food chain that wreaks epigenetic injury on the millennial generations X, Y, and Z.

Health Risks of Dollar Bills

The bacteria found in a study of DNA on dollar bills include STAPHYLOCOCCUS AUREUS, ESCHERICHIA COLI, HELICOBACTER PYLORI, and CORYNEBACTERIUM DIPHTHERIAE. You might want to wash your hands after handling money and before eating.

Health Risks of Pets

"We weren't meant to live with horses, cows, sheep, pigs, monkeys, guinea pigs, cats, dogs, and chickens, nor to come in contact with dozens more at a zoo. We do so at our own peril. "

--Dr. Hulda Clark

Most parasites come from animals you associate with. Indoor pets infect family members and everyone in the family, including pets, needs to be treated for parasites. Since getting infected daily and then having to kill parasites daily is NOT a sustainable solution, it may be inadvisable for a person of low immunity to keep indoor pets.

Toxoplasma Gondii

According to the February 17, 2014, REUTERS news British brain scientists published a study in the *Proceedings of the National Academies of Science* (PNAS). *John Williams*, head of neuroscience and mental health with the *Wellcome Trust charity*, noted that EUROPE desperately needs ways to identify people at high risk of DEPRESSION for early treatment.

Professor of Clinical Neuropsychology, *Barbara Shakian*, with *Cambridge University* worked on the study and she cites that mood disorders cost EUROPE more than \$150 billion a year.

Perhaps the UNIVERSITY OF MICHIGAN MEDICAL SCHOOL's findings about the link between *cat bites* and DEPRESSION would be useful to the Brits. Maybe the coping skills needed are how to best treat TOXOPLASMA infections.

Associate Professor *David Hanauer* with the UNIVERSITY OF MICHIGAN MEDICAL SCHOOL analyzed electronic health records of 1.3 million patients seen by the university's health system and found 41% of those treated for *cat bites* were also diagnosed at some point with DEPRESSION. The research was published in the August issue of PLOS ONE.

The AMERICAN PET PRODUCTS ASSOCIATION estimates 45.3 million U.S. households have pet cats. That is greater than one third of the U.S. population. Of those, 10 to 20 percent of cat owners are estimated to be infected with TOXOPLASMA. You may find this information very valuable because DEPRESSION affects around 350 million people worldwide and depressive suicide alone leads to a million deaths a year. You may get confused about what used to depress.

According to *Professor Robert Yolken* with JOHN HOPKINS UNIVERSITY, TOXOPLASMA infections increase the risk of SCHIZOPHRENIA and SUICIDAL BEHAVIOR in humans. TOXOPLASMA symptoms may include BLINDNESS, MENTAL DISABILITY, or CENTRAL NERVOUS SYSTEM DAMAGE.

TOXOPLASMA infection could be the beginning of a lifetime of EYE DISEASE, and since it invades the brain, it frequently causing a DULL ACHE or PRESSURE AT THE BACK OF THE HEAD.

Cats pick up the TOXOPLASMA GONDII parasite from eating birds and rodents and then shed the parasite in their feces. The infectious stage of the TOXOPLASMA is in the feces. For that reason *Dr. Hulda Clark* said that there should never be a cat box in the house, and to never let a child near a cat litter box.

Carlsen; Aaron Glatt; William Schaffner, CDC; Jeffrey L. Jones; Robert H. Yolken; Sandra B. Barker; and *The Cure to All Diseases*, by Dr. Hulda Clark ; United Nations Population Fund, www.unfpa.org; UNICEF; February 17, 2014, REUTERS; February 18, 2014)

Nuclear Savage

Adam Horowitz's 2011 documentary film's world premier at the *International Documentary Festival*, was broadcast on PBS, and *Nuclear Savage* won the Audience Award for the Best Film Cinema Planeta International Festival, Mexico. The NUCLEAR SAVAGE movie is a true story about Marshall islanders and it brings provocative information to the table.

High Power

The award-winning new documentary *High Power* showed at Carnegie Mellon University, in Pittsburgh, PENNSYLVANIA on March 3, 2014. The film has won the Yellow Oscar in the short film category in the Rio de Janeiro URANIUM FILM FESTIVAL. It is the story of the radiation exposure effects upon the village of Tarapur, INDIA, from their nuclear power plant.

Pop Quiz

Did you know this issue represents the one-year anniversary for the *Eco-Community Dialogues* newsletters. I hope you have enjoyed reading the weekly newsletters ever since May 23, 2013. Did you know I have offered them as a FREE community service for an entire year now and the whole set of over 52 newsletters is available from the A Street Print & Copy shop across from ACE hardware, in Ashland, OREGON.

The print shop only charges for paper and ink or a little service fee to download the entire PDF file onto people's thumb drives to read off their computers and save paper and ink. You may want to obtain a complete set and pass it forward to your family and friends.

Fair Use Notice: The *Eco-Community Dialogues* newsletters are intended for educational and informational purposes only. Just in case there's any copywriter material, the use of which material may not have always been specifically authorized by the copyright owner, it is believed that the intention of these newsletters constitutes a "Fair Use" of any copyrighted material as provided for in section 107 of the US Copyright Law. In Accordance with Title 17 U.S.C. Section 107, the *Eco-Community Dialogues* newsletters are distributed without profit to those who have an interest in using the included information for research and educational purposes.
